Report No.  
PN-8

(Price: 10 cents)

## PREFACE

The population of Newfoundland is shown in this report classified by birthplace and sex, and by country of allegiance and sex. This report is part of a series giving final population figures from the 1945 Census of Newfoundland. Previous reports in this series have presented data relating to the subjects of sex, age, marital status, religion, literacy, ethnic origin, and school attendance. Figures relating to movement of population will be presented in a subsequent report.

Numerical and percentage distributions for the population of Newfoundland as a whole by birthplace are shown in tables 32 and 33. The first is historical and shows figures by country of birth for each census from 1857 to 1945, while the second presents a more detailed breakdown of birthplaces for 1945. Table 34 gives the populations of the 25 districts by birthplace from 1921 to 1945, and table 35 classifies the Newfoundland-born population of each district by district of birth and sex. Table 36 shows the population by country of allegiance at the last two censuses, 1935 and 1945.

The reports in this series represent final tabulated results from the Census of Population, Agriculture and Fisheries, taken by the Newfoundland Government in 1945. These tabulations have been carried out in the Dominion Bureau of Statistics at the request of Newfoundland. Further reports are being released to show classifications of the population by occupation, industry, income, etc., as well as data relating to households and families, and summary compilations.
